

AI SEO Audit Report

Website: <https://example.com>

Audit Date: June 29, 2025

Executive Summary

Overall AI Search Readiness Score: **55/100**

Critical Issues

- Lack of schema markup and structured data
- Content does not answer questions naturally

Priority Recommendations

- Incorporate schema markup for better SERP visibility
- Improve content length and include relevant keywords
- Create a meta description that accurately describes the website's content
- Optimize content for voice search by including conversational language
- Improve AI readiness by leveraging NLP and semantic content structure

AI Search Optimization

- Content lacks depth and complexity, reducing AI's ability to understand and rank it
- Absence of semantic content structure

Voice Search Optimization

- Content is not in a conversational format, which can hinder voice search performance

Quick Wins

- Add a meta description
- Implement schema markup
- Increase content length
